

## DJ50SQ Chamfering machine

### Technological parameters :

- (1) Hand feeding, automatic blade driving and retracting, results in high speed that doubles the production capability.
- (2) This machine is good at chamfering the inner and outer corners of tubing and barstock. Chamfering and deburring are accomplished in a single cycle with speed and good accuracy.
- (3) The clamping die and saw plate are precisely designed to ensure the stability of the centerline between the processing pieces and saw plate.
- (4) The saw plate (knife holder) is specially designed, saw blade standardized, the adjustment of blade is easy and quick.
- (5) Pipe diameter for DJ50SQ is 19-50mm  
Suitable pipe-diameter :19-50mm(less than 16mm specially appointed)

The electric motor is normally 3 phaase 380V but 220V, single phase is available.
