

## DA-65W

 **Back to Pressbrake controls**

Slimline CNC system for hydraulic press brakes with 2D graphical product programming and CNC production

The DA-65W is a **user-friendly** and **fast programmable** CNC control for press brakes.

The Delem DA-65W can be programmed by simply drawing the profile of your product on the screen. With the help of the 2D simulation view you can calculate the optimum bending sequence and view how to place your product in the machine.

Many facilities are supported such as:

- **2D** product programming.
- Real-time **Windows** system for multitasking and file management.
- **Instant shut off** for easy power-down and start-up of the control.
- Optional easy **Windows Networking**.
- **USB** interface for easy connection of external devices (keyboard, mouse, etc.)

### **Main Technical Specifications**

Colour display LCD (TFT)  
2D Graphical CNC  
PLC functions  
Slimline housing  
Basic Windows Application suite
