

JFY FOREMOST MACHINERY CORPORATION

TURRET PRESSES

JFY TURRET PRESSES
Are Available Exclusively
from Foremost Machinery

Jinfangyuan CNC Machine Co. Ltd. (JFY) is one of the premier machine builders in Asia, with an annual production of over 450 CNC press brakes and turret presses. They are ISO 9001 certified and blend their manufacturing expertise with US, European and Japanese components from Festo, NSK, NTN, FANUC, Siemens, Bosch-Rexroth, & Schneider. JFY has combined these elements to produce: 1) a mechanical turret press, ET-300; 2) a hydraulic turret press, VT-300; and 3) a high speed hydraulic turret press, RT-300 that run at 300, 600, and 1,000 hits per minute respectively. All models are 33 Ton, although the VT is also available in models up to 88 tons.

Foremost Machinery Corporation is proud to represent JFY and welcome them into the MJ Allen group of companies. We are offering the JFY line of products exclusively in North America. To support this partnership with JFY, Foremost in addition to its own staff has arranged for cooperative agreements with independent contractors such as Romstar in Canada that will handle programming training and software support. We also proudly announce several similar agreements throughout North America with regional partners with service expertise to assist with machine installation and warranty service work for CNC turret presses and press brakes.

Our mission is to deliver our products and services to the complete satisfaction of our customer's needs. After thirty years in business, we look forward to carrying forward our passion, to make you "First with Foremost."

Hydraulic Model VT-300 - 600 Strokes / Minute

Mechanical Model ET-300 - 300 Strokes / Minute
